

Homework 8

Tannishtha Ghosh

March 2025

1 STATA

1. See Figure 1
2. The recycling pause led to a 0.62% decrease in NYC recycling rates, with a standard error of 0.005.
3. The synthetic DID estimates the average treatment effect to be equal to a 0.64% decrease in NYC recycling rates, with a standard error of 0.006. For plot, see Figure 2.
4. See figure 3
5.
 - (a) See Figure 4.
 - (b) See Figure 5.
 - (c) See Figure 6.
 - (d) See Figure 7.

2 Figures

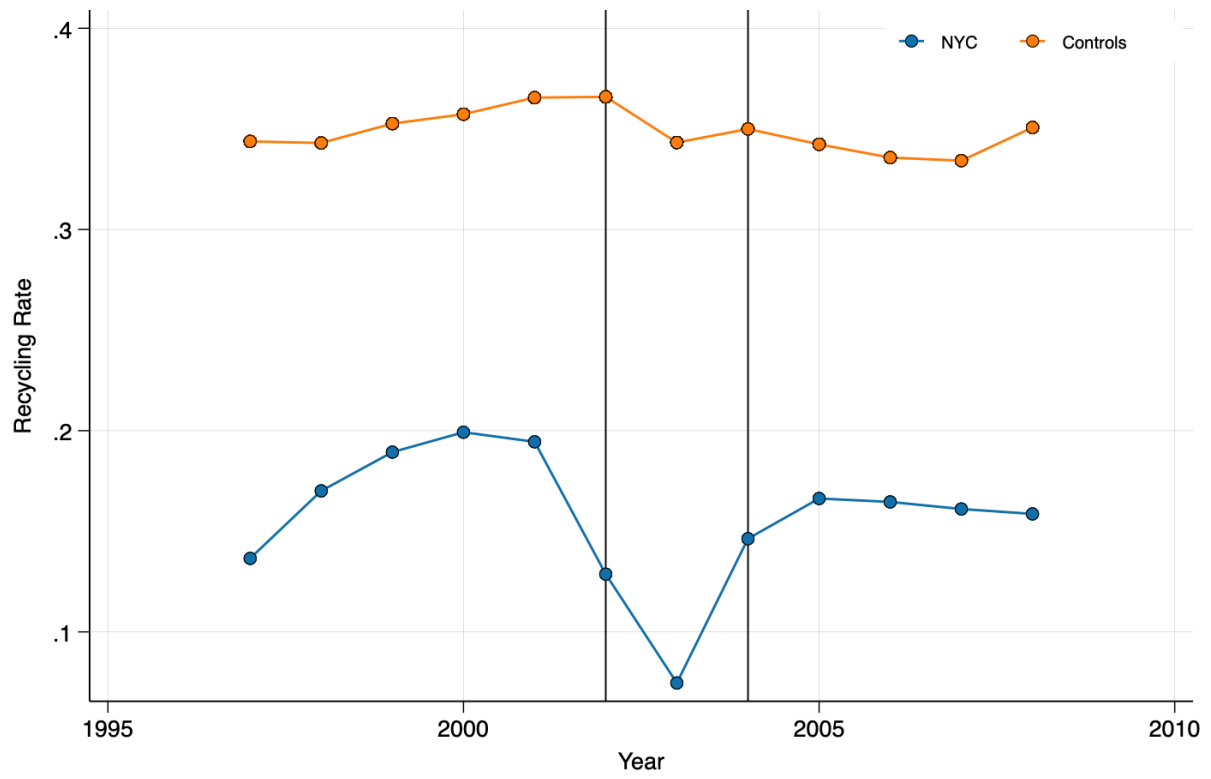

Figure 1: Average Yearly Recycling Rates for NYC and Control regions

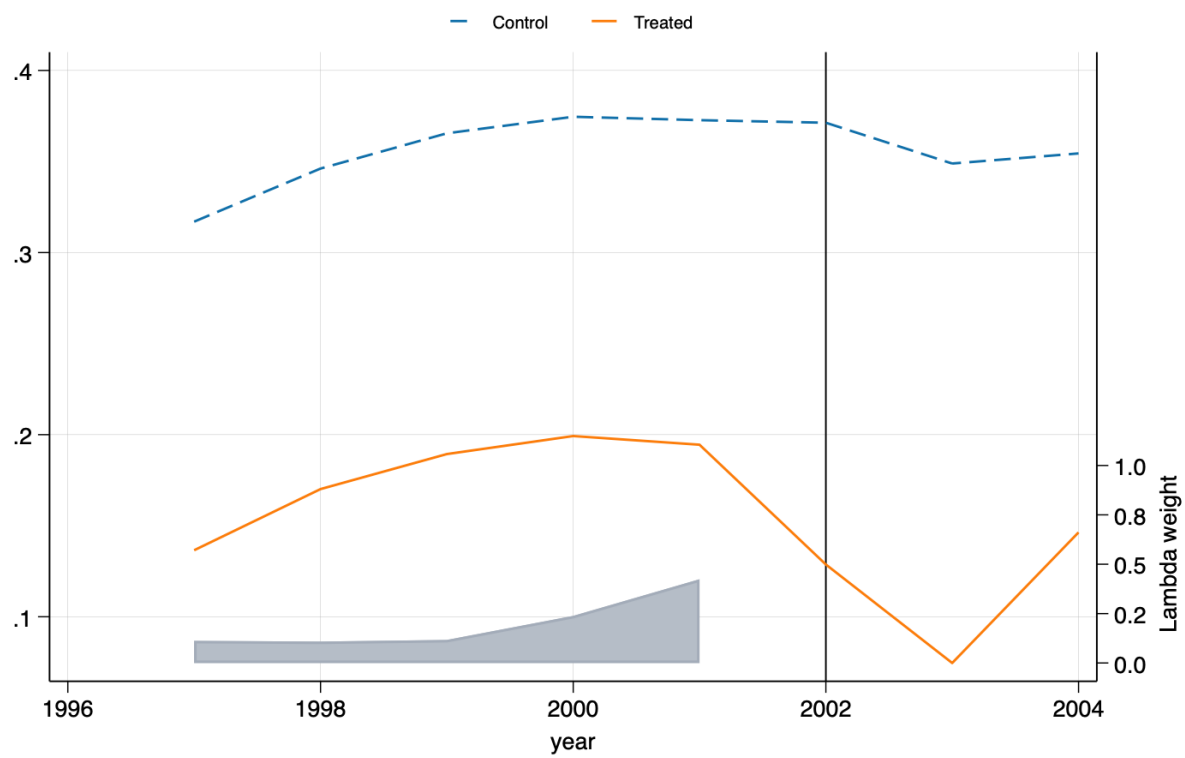

Figure 2: SDID plot

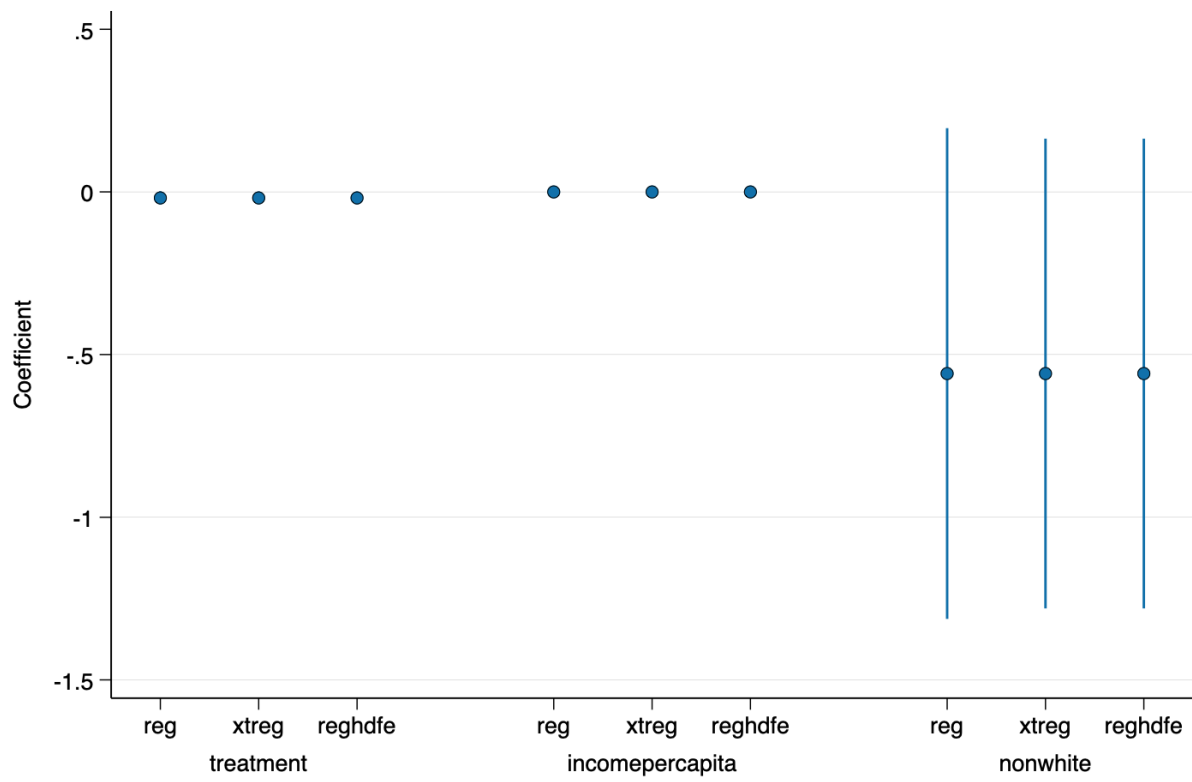

Figure 3: Event Study Plot

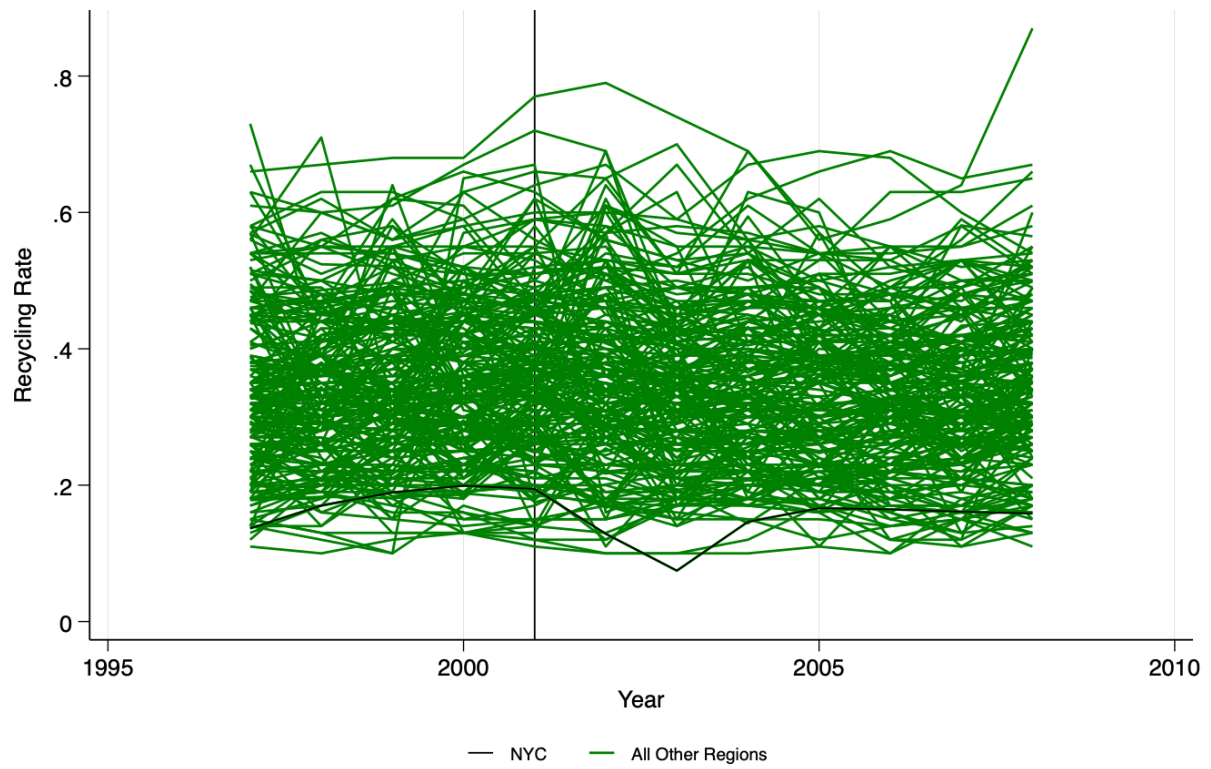

Figure 4: Raw outcomes for treated and control groups over time

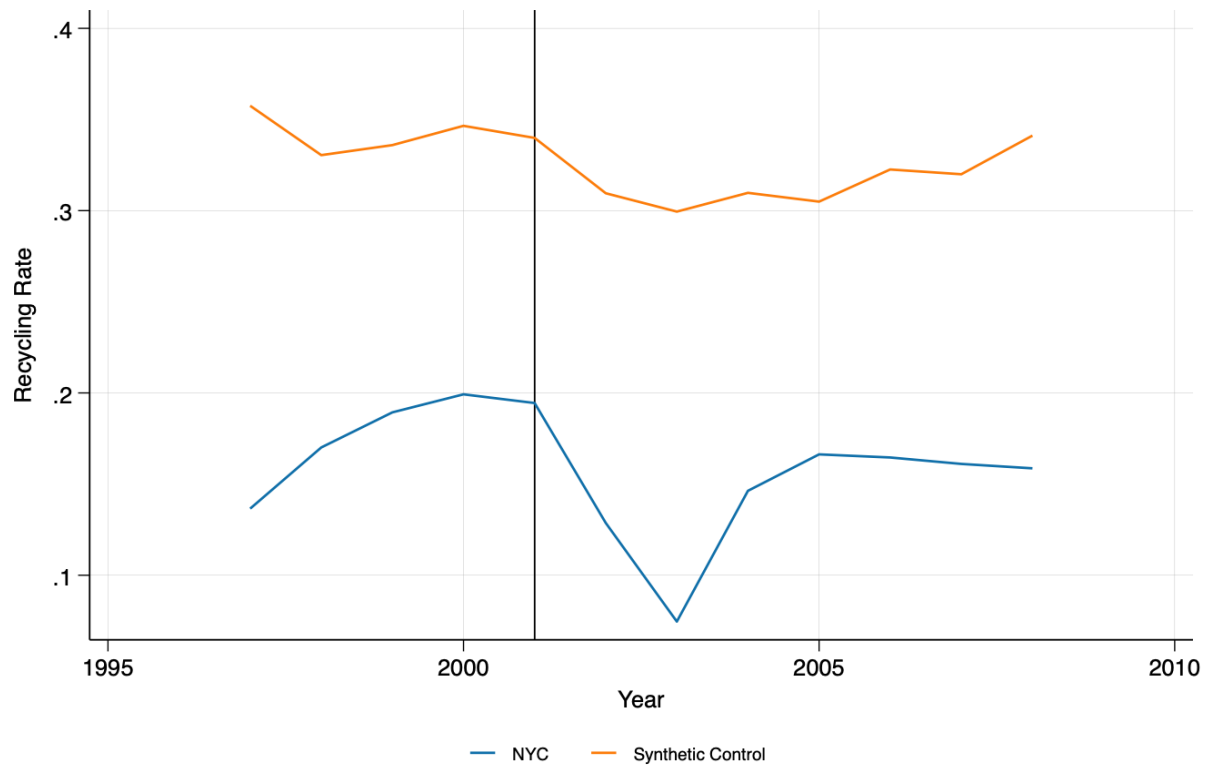

Figure 5: Raw outcomes for treated and synthetic control group time

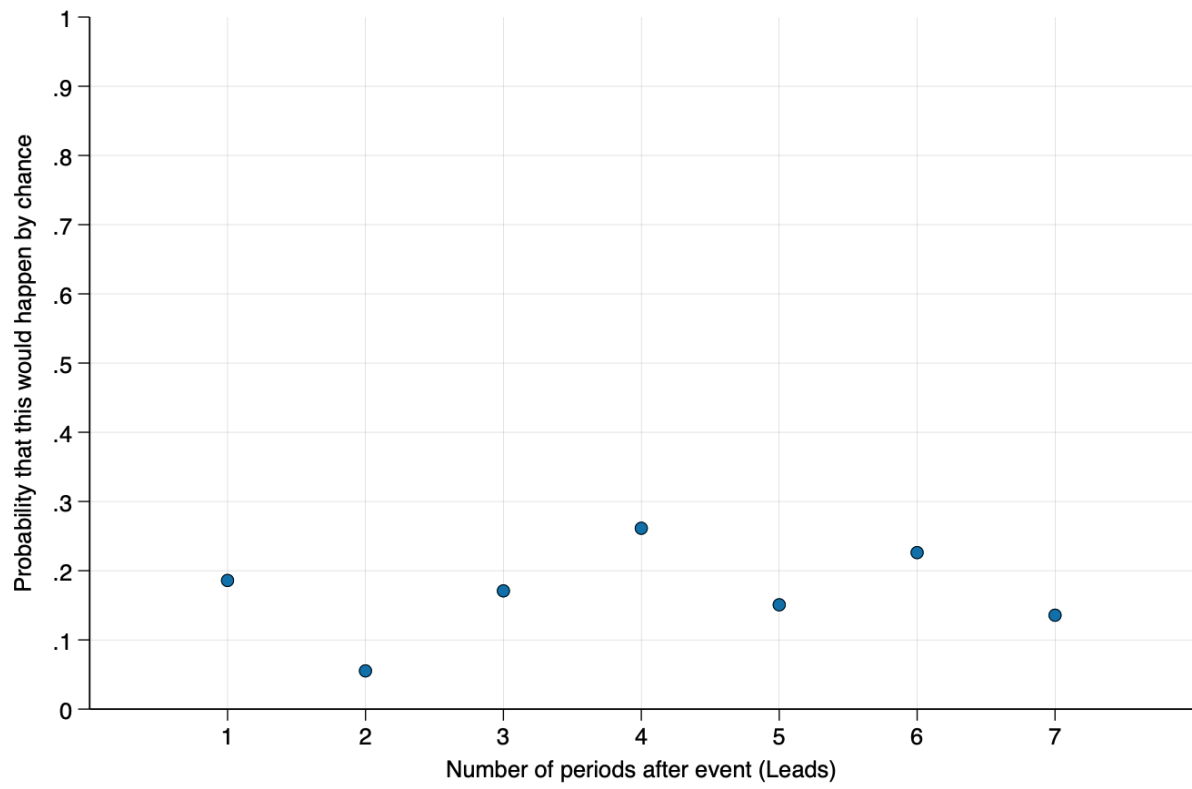

Figure 6: Placebo effects over time

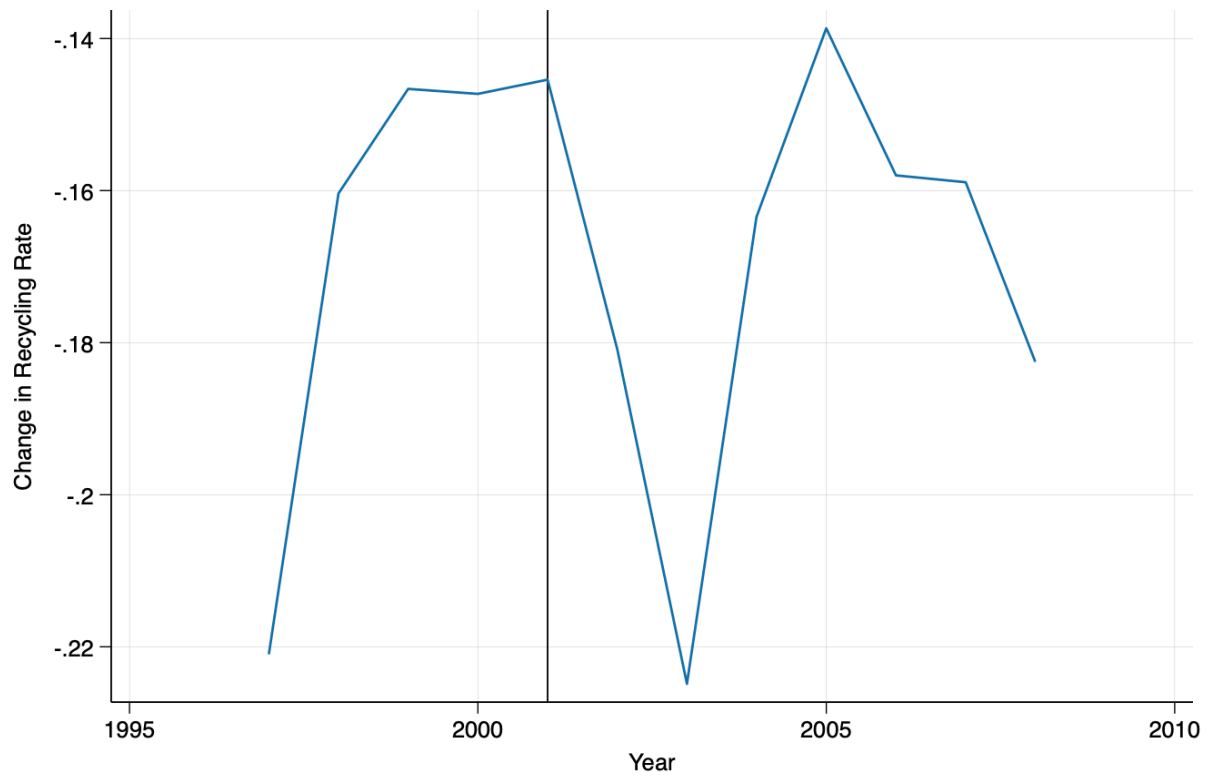

Figure 7: Final synthetic control estimates
